Stay Safe Online

A Simple Guide to Protect Yourself

Easy cybersecurity tips for avoiding scame and staying safe online

Common Online Scams

- Phishing emails pretending to be banks or services
- Scam text messages saying **"Your account is locked"**
- Phone calls claiming to be tech support or the government

Never click links or share personal details with unknown sources

How to Stay Safe

- **Use strong passwords** (12+ characters)
- **Enable Two-Factor Authentication (MFA)**
- **Keep personal details private**
- **Check links before clicking**

If unsure, don't click it.

If You Think You've Been Scammed

- Contact your bank **immediately**
- **Change your passwords**
- Report to **Scamwatch Australia**
- Monitor your accounts for unusual activity

Act quickly to reduce damage

"If it feels suspicious or too good to be true — it probably is."
